About PHYTOSLIM

The advent of technology has brought with it innumerable and vast benefits for mankind. But along with it, it has brought its fair share of miseries as well. Previously, people's level of physical activity to just complete their daily chores was enough to expend all the energy that the food they consumed built in. In fact, they needed this energy.

Today, with our "modern" lifestyles and one that affords us the luxury of an automobile to travel even the smallest distances, natural activity like walking, have completely taken the back seat. In addition to this, we have an array of "fast food" and "instant foods" that deprive us of all the nutrition that nature has provided. "Life on the go" comes with so much stress...deadlines, targets, meetings that one fails to recognise the importance of one's own health.

Contents : Vrikshamla-Garcinia indica, Guggulu-Commiphora mukul, Kanchanara-Bauhinia varigata, Vidanga-Embelia ribes, Triphala-Embolica officinalis-Terminalia chebula-Terminalia bellerica, Methika-Trigonella foenum-graecum.

So, Why PHYTOSLIM?

PHYTOSLIM is a Clinically Proven, 100% safe and natural slimming therapy, with absolutely no side-effects. Developed by Herbasynth Medicare, a leader in scientifically researched herbal products, PHYTOSlim has a favorable effect on weight reduction and lipid profiles.

PHYTOSLIM reduces weight through the following actions.

- It enhances the metabolic rate and hence helps in burning fats and lipids inside the body.
- It inhibits the manufacture / synthesis of fatty acids in the muscles and liver and thus arrests lipogenesis.
- It reduces the craving for sugar and neutralizes excess sugar in the body
- It reduces cholesterol and triglyceride levels – factors concerned with the management of obesity.
